

THE GLEICHEN CALL

VOLUME 44 NO. 33

Authorized as second class mail, GLEICHEN, ALBERTA, WEDNESDAY OCTOBER 31, 1951

SUBSCRIPTION \$2.00 PER YEAR

HERE AND THERE

Born to Mr. and Mrs. C. Goring on an October 25th.

Born to Mr. and Mrs. T. Denny a boy on October 23rd.

Mrs. P. Merkle and daughter of Calgary were weekend visitors to the home of Mrs. Cam Evans.

Hallowe'en is tonight and as usual the children of town will be out in full force having the time of their lives.

Dave Wilson who has been ill for the past several weeks was taken to the Belcher hospital in Calgary last week. Mr. Wilson is a veteran of the Boer War and World War 1.

Major and Mrs. A. F. Parkinson of the Salvation Army, left for Vancouver Saturday to attend an Army conference. They expect to be away for a couple of weeks.

Wonder if the Old Timers will stage a dance this year?

A farmer was losing his temper trying to drive two mules into a field when the parson came by. "You are just the man I want to see!" said the farmer. "Tell me, how did Noah get these into the ark?"

Miss H. McArthur of Vancouver spent a day in town visiting Mrs. G. W. McArthur. Mrs. McArthur was en route home after spending several months in Ontario visiting relatives. When these two ladies were toddlers they went to school together in Woodville, Ontario, there fore they have known each other for a long time.

Mrs. E. Kosman of Edmonton spent a few days in town last week visiting her brother Ted Krause and family.

Major and Mrs. L. Hansen returned last week from Winnipeg where they attended a Salvation Army conference.

On Monday evening, November 12th, the boys of the Gleichen branch of the B. E. S. L. are putting on their annual Remembrance Day dance in Gleichen Community Hall. The boys invite all to attend. It is well known that their annual dance is a popular event and is always largely attended. Therefore it is hoped this year will prove no exception from an attendance standpoint. It might be added that all profits will go towards helping any needy members.

T. B. Northfield, Optometrist, will make his regular visit to Gleichen at the Hotel on Friday afternoon, November 2, 1951, for purpose of examining eyes, etc. Calgary office is 514 Greyhound Bldg.

A real old fashioned chinook struck the district Saturday and Sunday and melted most of the fall. But Sunday night snow started to fall and by morning the ground was covered with about four inches of snow. The hope of getting the corn harvested looks mighty slim.

"I'll have to have a rise, sir," said the bookkeeper. "There are three companies after me." "What three?" demanded his boss. "Light, telephone and water," was the reply.

The Salvation Army

Meetings in the Auditorium of the Eventide home as follows:
Saturday, November 4th.
2:30 p.m. Praise meeting.
7:30 p.m. Salvation meeting.
Wednesday, November 7th.
7:30 p.m. Public meeting.
Sunday School every Sunday at 10:30 a.m.

Grain Drying

Experimental Farm Notes.
The unusual weather conditions encountered this fall has resulted in a widespread demand for information on the methods and problem of drying grain. Considerable research has been done on this problem at Purdue University in Indiana. This research covered the drying of sorghum, cereal, and corn crops.

Cereal grains cannot be safely stored for short periods at greater than about 14 percent moisture. For long term storage it should be less than 10 percent. The standard moisture content for grain is 12 percent.

be safely dried down from 18 percent moisture to 12 percent provided proper drying techniques are used.

Artificial drying of grain requires two basic components—air movement and heat. Air is required to carry the moisture out of the grain. Studies have shown that drying should start with only a shallow depth of grain covering the false floor in the bin. The drying process can be continued with successive layers of grain up to maximum depth of 8 feet.

Heat is used to increase the moisture holding capacity of the air passing through the grain. As an example assume that outside air temperatures are 30 F and that this air has a relative humidity of 50 percent. This air contains 97 grains of moisture and can absorb an additional 97 grains. A rise in temperature of 30 increases the maximum moisture holding capacity to 194 grains or about times its original content. The application of heat has approximately tripled the maximum moisture holding capacity of this air. One bushel of wheat at 18 percent moisture must lose 16,800 grains of moisture to reduce it to 14 percent moisture content.

Excessively high temperatures should not be used. Generally a temperature increase of 20 to 30 degrees is sufficient for drying. Temperatures over 115 to 120 degrees may reduce the grain unit for certain food and milling purposes. Commercial units, if purchased, should be sure certified to standards that they have the following features: sufficient air fan capacity to provide 100 cubic feet of air per minute for each bushel of grain. Heat should be provided by gas burning mechanisms which are easily controlled. Mechanical temperature controls should be used to prevent excessive temperatures and to avoid any fire hazard.

An farm unit at present operation in southern Alberta is drying wheat at 18 percent moisture down to about 13 percent. The grain is being dried in batches of 100 bushels; each batch requiring about one hour in a special drying bin erected for the purpose.

The need for artificial drying under unusual weather conditions is a questionable, however, this year's experience has focussed considerable attention on the problem.

LISTEN MEN!

A lot of you men who think you're the cat's whiskers, listen to the following. 'Twas written by a woman and she tells you, all the varieties of men, what and who you are. Men are what women marry. They have two feet, two hands, and sometimes two wives; but never more than one idea at one time. Generally speaking, they may be divided into three classes; husbands, bachelors and widowers. An eligible bachelor is a man of obstinacy entirely surrounded by suspicion. Husbands are of three varieties: prisms, surprises and consolation prizes.

Making a husband out of a man is one of the highest plastic arts known to civilization. It requires science, sculpture common sense, faith hope and charity—especially charity. If you flatter a man, it frightens him to death, and if you don't, you bore him to death. If you permit him to make love to you, he gets tired of it in the end, and if you don't, he gets tired in the beginning.

If you believe him in everything you soon cease to interest him, and if you argue with him in everything you soon cease to charm him. If you join in the gossips and approve his smoking, he swears you are driving him to the devil and if you don't approve of his smoking and urge him to give up his gossips he vows you are driving him to the devil. If you are the clinging vine type he doubts whether you have a brain and if you are the most advanced and independent woman he doubts whether you have a heart. If you are silly he looks for a bright mate and if you are brilliant and intellectual he looks for a playmate. A man is but a worm of the dust—he comes along wiggles about a while and finally some chicken gets him.

Carol: "Mother, why do you marry Father?" Mother: "So you'd be wrong to wonder too."

The pain tree is so named because its leaf was found to resemble the pain of a person's hand.

WEDDING

WOODS-WESTLAKE

The marriage of Mr. Dennis Woods of Vancouver, son of Mrs. E. Woods, Gleichen, to Miss Winnifred Westlake, daughter of Mr. and Mrs. John Westlake, took place at Vancouver recently in St. Peter and Paul church. Rev. Fr. Nicol officiated.

Mr. and Mrs. Lionel Howard were best man and bride's maid.

After the wedding ceremony a reception was held in the Hotel Vancouver.

The honeymoon was spent in the western United States. Mr. and Mrs. Woods will reside in Vancouver where Denny is on the staff of the Vancouver Province.

COURTESY AND SAFETY

"Why is it," remarked a Gleichen man, "that a man who may accidentally jostle you in a crowd, turns and says 'I'm sorry,' or 'I beg your pardon' but who when he gets behind the steering wheel of a motor car throws all ideas of courtesy to the winds and acts as if you had no rights whatever even the right to live?"

It is an unsolved puzzle of the present age. A man ordinarily polite and courteous, who, if he is bumped into another couple when dancing or stepped on his partner's toe, would express his regrets, when engaged in motorizing, all too frequently, like an ignorant, uncouth brute. He who would hesitate to steal so much as a lead pencil from another, finds nothing at all of stealing the right-of-way at a road intersection, even (as a lady considers) he has done something smart, and even deserves a job or two whom he has made his victim. 'Tis he is guilty of that only of moral sense but not of a legal sense, because the law draws an inference to take the right-of-way from another to whom it belongs.

Many a motorist, who if standing on his own two legs on the shore of a lake would never even entertain the thought of pushing a non-swimmer into deep water at the peril of his life, nevertheless does not hesitate to follow a motorist—possibly a beginner in the art of driving—off the road at the risk of smashing the other car and possibly seriously injuring or killing him.

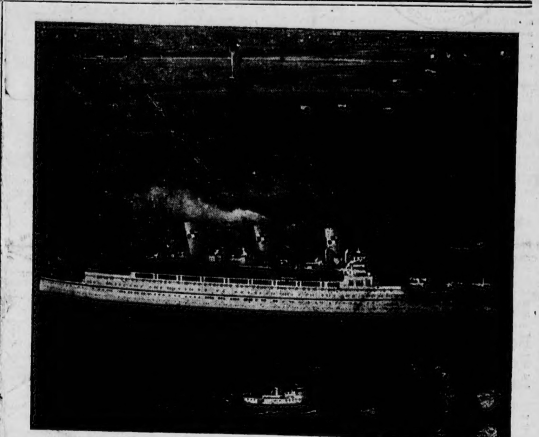

And why is it that so many men, naturally polite and courteous, refined in language and manners, become abusive, profane and puerile on some slight mishap on the road? That is, it is about a motor car, or the pleasure or business of motorizing, that so completely changes many men, and women too, from their usual tenets of conduct into the most disagreeable creatures, reckless and regardless of the rights, comfort and safety of others.

Is it merely because the modern motor engenders such speed that the drivers of cars become reckless, headless, and for the time being at least are no longer normal human beings? Or is it that peculiar quirk in our human makeup that seems to impel us to do what both common sense and the law says we are not to do?

The conduct of not a few, but countless thousands of motorists is an unsolved mystery. No man, except he be a maniac, would think of throwing vitrol into another's face and thereby blinding him, but to any one used to travelling our highways at night it would seem that a lot of car drivers think nothing at all of driving past approaching cars with powerful, unaimed headlights completely blinding for the time being the drivers of those other cars, and inviting disaster. Is it that they are just too lazy to be even bold to dim their own lights for a few seconds? Or is it that something, some petty means of disposition, some un-understandable twist in their character which does not at other times display itself?

And how much pleasure it would add to motorizing if courtesy instead of a rude boorishness became the universal habit of the road! And, oh, how much it would add to the safety of the road.

Governments provide rules and regulations governing the condition cars, automobile clubs and associations, un-understandable, but perhaps, some day, we will have a better system.

EMPERESS OF SCOTLAND AT NEW YORK

The 26,800-ton Canadian Pacific luxury liner Empress of Scotland, shown here passing the Statue of Liberty at New York, has been scheduled for three sunshine cruises.

lights, tires, steering gear, etc., and all serve a very useful purpose. But a uniform, universal recognition and acceptance of the ordinary rules of courtesy by one toward another, and by each toward all, would do more than any one thing to obviate accidents with their present appalling bills for damages and irreparable loss of life.

As a nation we are striving with might and main and the expenditure of fabulous sums of money to combat dread diseases of one kind and

from New York to the storied Caribbean this winter. She will leave for the Spanish Main for her first 16-day cruise on February 1, following this with trips on Feb. 20 and March 8. Prior to starting her cruise season, the white-hulled flagship will have

another; we are engaged in conservation of our forests our streams and water-powers, our fisheries, our minerals; we spend millions on research work to combat rust in wheat, grasshoppers, and other pests which destroy the proceeds of our agricultural labors, yet we go blithely on taking human life recklessly, needlessly, maiming many more, and destroying millions of dollars worth of property annually through the agency of the automobile, which to many has become a dread and a men-

the honor of carrying Princess Elizabeth with the Duke of Edinburgh back to England following their tour of Canada. New posts of call in the Virgin Islands and Barbados have been added to this year's cruise itineraries.

as when it ought to be a joy and a blessing.

England's flag is not allowed to enter the House of Commons. In 80 years of operation North American railroads have cut fatal rail accidents by 85 percent.

Any Dodge owner will tell you...

...You can't beat DODGE FOR DEPENDABILITY

THESE "Hidden Values" HELP PROVIDE THOUSANDS OF EXTRA TROUBLE-FREE MILES

Independent Parking Brakes
Safety Rim Wheels
Automatic Electric Choke
Bolt-On Fenders
Floating Oil Tanks
Oil Bath Air Cleaner
Flexible Power Radio Mounting
Exhaust Valve Seat Insulators
Electric Windshield Wipers
Dodge Fuel Filter in Gas Tank
Splash-Proof Ignition System

ONE OF THE BEST WAYS for you to find out the real worth of any car is to get the opinion of a number of owners.

For more than 15 years, Dodge owners have been the Dodge car's most enthusiastic salesman. This is because they know Dodge has pioneered in developing important automobile advancements; because they know Dodge combines research, manufacturing skill and careful inspection to produce a car of outstanding dependability.

So take a tip from Dodge owners and your new car investment will pay dividends—in finer performance, longer life and less upkeep.

CENTRAL MOTORS

A Prison Reform

MUCH THOUGHT HAS BEEN GIVEN in recent years to methods of dealing with criminals and of conducting penal institutions. Modern prisons differ greatly from those of earlier times and there is a growing tendency to better living conditions in prisons and to help prisoners towards rehabilitation while they are serving terms in penitentiary. It has recently been announced by Joseph McCully, Deputy Commissioner of Penitentiaries, that nearly 2,000 inmates of penitentiaries in Canada are now taking correspondence courses in educational subjects. This is part of the programme which has been undertaken to help prisoners to fit themselves for useful work when they return to the outside world.

Proved Plan

Is Worthwhile

Results of permitting prisoners to take correspondence courses have proved that the plan is well worthwhile. A recent survey, taken of prisoners at Collins Bay penitentiary, Kingston, Ontario, showed that nearly eighty per cent. of those taking courses did not revert to crime after leaving prison. In many cases criminals are men who have not been trained to make their living honestly, or who have been in work for which they were not suited. Trained for useful work, and for skills fitted to their abilities, many are happy and successful after receiving vocational instruction while serving terms in penitentiary.

Meeting With Good Results

Mr. McCully drew attention in his report to the fact that restriction of personal liberty was the greatest punishment suffered by prisoners, and that proper treatment during their term in penitentiary could result in them going out as better and more useful citizens. This new policy of putting emphasis on the rehabilitation of prisoners is meeting with excellent results. For many years there has been interest in all parts of Canada in improving conditions in prisons and in getting that progress is being made in dealing with this important social problem.

No Water Loss To Manitoba In River Project

OTTAWA. — Manitoba need not worry about any water loss through the operation of the South Saskatchewan river project, G. M. Ferris (L-McCann) told the commonsense.

Speaking in the throne speech debate, Mr. Ferris said that the development project at Frog Narrows on the Churchill river could control the waters as far as Lake Winnipeg during high water at Frog Narrows. The Churchill flows down into the Saskatchewan.

Extension of the Sheridan-Lynn Lake railroad right through the north to Heintz Lake, Lake Athabasca and Uranium City in Northern Saskatchewan, and then to Fort Smith and on to Prince George, B.C., was advocated by Mr. Ferris. He also suggested construction of a defence highway from Edmonton to Winnipeg.

The MacKenzie member asked that the government spare no expense in trying to defeat the new threat of rust in western Manitoba and eastern Saskatchewan.

Expect 7,500 Farms Wired This Year

REGINA. — The Saskatchewan Power Corporation said it expected 7,500 farm homes would be wired for rural electrification by the end of the year. The total indicated that about 3,000 homes had been wired already this year.

The power corporation said the general construction program was ahead of last year's, with 84 miles of line completed. About 65 miles had been finished at this time last year.

GOLDEN PRairie A GOOSE-HUNTERS PARADISE

GOOSE-HUNTING PARADISE — The district around Golden Prairie is a goose-hunter's paradise as it seems. Recently a nine-man hunting party bagged 43 of the big honkers, one of which weighed more than 12 pounds. They aren't even wild, hunters report. The geese have been seen feeding in flocks close to the roads and the passing traffic bothers them very little.

PLENTY OF DEER

FORT FRANCES, Ont. — Prediction that deer herds will increase again in a few years was made by R. C. Patterson, Ontario Government biologist who conducted a wide survey of this area.

ICE ACCIDENT PREVENTION AND RESCUE

This is the time of year that the first ice forms on sloughs, ponds, creeks. Children are anxious to put on their skates and start the skating season. The fun is not without its danger as the ice has hardly had time to become thick enough for real safety.

Parents should investigate the skating site by chopping a hole in the ice and measuring the thickness. Two inches is fairly safe for individuals, three inches for small groups.

It would be wise for an adult to go with the children. The superior should take along a length of rope and a long pole. Should the break through occur, rescue attempts can then be started without delay.

The victim should support himself by spreading his arms on the ice surface. Rescuers should lie down so as to spread their weight then acquire their way toward the victim until he can be reached with the pole or rope.

The rope should have a small loop at one end so the victim can slip his hands through for a secure grip.

If ice crossings must be made it is wise to carry a long pole which will support the bearers weight across the hole, should the break through. Avoid skating or walking on ice alone.

If you break through you will likely need help. Ice that borders open water is usually quite thin, which as might be found on running streams.

Springs are frequently found in large bodies of water and the spring water often creates thin spots in what appears to be quite thick ice. Skaters and walkers are wise to keep close to shore where they may be reached quickly provided of course that there is someone present who is equipped and capable of performing a rescue.

Thousands Of Trees Given To Sask. Schools

REGINA. — Many of the young trees resting for the winter on Saskatchewan school grounds came from the forest nursery station at Indian Head.

Last year more than 30,000 young trees were sent free of charge to schools from the station for the conservation and beautification of school grounds.

The station supplies certain trees and shrubs free to any school in the province, in co-operation with the provincial department of education. Trees and shrubs available for school use are maple, ash, northwest poplar, Russian poplar, leaf willow, laurel willow, cottonwood, ararag and elm.

"Evergreens are not on the free list," L. P. Tins, chief superintendent of schools, said. "But these may be obtained at a small charge if applications are made directly to the station."

Flowering shrubs are not available. Schools wishing trees apply to either the department of education or nursery station.

A federal government conservation project, the Indian Head nursery also supplies trees for Manitoba schools.

Old Custom Says Prince Philip Responsible For Indian Family

REGINA, Sask. — Prince Philip does not know this yet, but he might as well learn the worst. From now on he is responsible for the children of Mrs. Joe Bear, Indian squaw of the Metis tribe near Stony Rapids, in north Saskatchewan.

There is nothing personal about this. It just happens that Mrs. Joe Bear made moccasins that were presented to Prince Charles and Princess Anne.

That is where the Prince gets hooked for Indian tribal custom says it down that any man who accepts moccasins from an Indian woman thereafter accepts responsibility for her children, past, present, and future.

That's only half the story. Never before were moccasins the occasion of such a hunt. Not until recently did the Saskatchewan Government know it would be in order to present the Princess with gifts.

When they did find out, they decided to give a unique gift of real Indian moccasins—and none of your store variety. But making moccasins in the old decorated Indian style is almost a lost art. So the went out to Saskatchewan's Government officials in the north:

"Two pairs of the best moccasins you can find. Sizes for boy approaching three and girl of year out."

All over the northland Indians decided the white man was going crazy. "Piss on it!" and other services were given.

The sky on lonely lakes was air strips near Indian villages.

And that's the end of the story — except to remind Prince Philip about that old Indian custom.

PRINCE RUPERT, B.C. — First wheat to be moved into Prince Rupert in a decade had started rolling into the dominion government's 1,250,000-bushel grain elevator here.

Deliveries are expected to be at the rate of about 100 carloads a week. About 600 carloads will fill the elevator.

Former Sask. M.P. Dies In N.W.T.

KITCHENER, Ont. — Albert Frederick Totake, former Liberal Member of Parliament in both the provincial and Federal desks, died at Yellowknife, N.W.T., after a brief illness, it was learned here. He was 69.

Born in Kitchener, Mr. Totake was educated at Kitchener public schools and the Collegiate, serving his apprenticeship in pharmacy in a drug store here.

He graduated from the Ontario College of Pharmacy in 1905 with honors. He received the degree Bachelor of Pharmacy from the University of Toronto in 1909.

The next year he moved to Saskatchewan and in 1908, at the age of 29, was elected member of the Saskatchewan Legislature for Vonda. He was chosen chief government whip. He retired from provincial politics in 1917.

He was elected member of the House of Commons representing Humboldt in 1925.

LARGER AREA — Vancouver Island has an area of about 12,400 square miles, compared with 2,184 square miles for Prince Edward Island.

OUR COMPLETE SHORT STORY

TOMORROW, KATE

Johnny, Her Boy ... Why? By Constance Edgerton

KATE ENLIGHTENED at the ranch house porch. It was a night like this twenty-seven years ago that she came here. She stood, a moment at the open door, then dropped to an old chair to dream of her new world, teaching the school nearby.

Twenty-seven years in one little school, and tomorrow was her last day. She would wear a set suit, thank her neighbors for their kindness and co-operation, give the impression she was ready to retire.

There was to be a program and picnic. It would never do to let anybody know she was sunk, felt ousted, because one young mother who insisted: "Young teachers for young children."

She knew from bits of talk, that Elton Gordon was particularly anxious to get another teacher.

Kate had reared Elton's husband, Johnny Gordon, from an orphan in the house the night she came. He was in a big chair, and when the laughter about him his hair was golden and his little face was so smug.

It was the morning she got her story.

Five years ago, an orphan. He had been living with the ranchers but came here, playing it was his home.

Kate had taken the school "night unseemly" because it had a house next door. She hadn't bargained that she was an adorable little boy to keep her company. They fell readily into life together. In time she bought the house and surrounding acreage. When Johnny finished the grade he entered a boarding school in town for high school. Vacations he worked around home. In time he was studying at university.

While he was a student there the Elton family came into the valley. Their daughter, Elton, was at the university, set on becoming a nursery school teacher. She and Johnny met.

HE WANTED TO FEEL BETTER FAST! FEEL BETTER FAST! FEEL BETTER FAST!

Fashions Weekly Sew-Thriftly

Only One Yard 54"

4899 WAIST 24-30

by Anne Adams

SEW THE ONE-YARD SKIRT! This requires only one yard of 54-inch fabric for any of its sizes—waist 24, 26, 28, 30. Look at the smart button trim and front flaps, the back-closing which makes this the best-fitting skirt you ever had. Look at the diagram above, two big, three little ones! Fashion, thrift and easy sewing in Pattern 4899.

This pattern easy to use, simple to wear, is tested for fit. Has complete illustrated instructions. Send thirty-five cents (35c) in coin (stamps cannot be used) for this pattern. Write plainly, send, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept., Winnipeg Newspaper Union, 50 Front Street W., Toronto.

Western Briefs

Gravel Kamack-Canora Road
KAMACK, Sask.—Easter driving between Kamack and Canora will come to pass shortly in spite of weather conditions. J. N. McEachern has been awarded a contract calling for 600 tons of gravel per mile, to be placed on No. 5 highway between here and Canora.

To Name Street
EDMONTON—An Edmonton street will be named in commemoration of his visit of Princess Elizabeth and Prince Philip. This will be a departure from usual Edmonton practice. A few carry names, but most streets and avenues are numbered in a grid system.

Will Be Helpful
MEDICINE HAT, Alta.—A baby-sitter and nursing service is provided here for parents attending morning services at a local church. Baby carriages will be wheeled right into the nursery from one church entrance.

Banded Chicken Shot
BRANDON, Man.—A prairie chicken, bearing band No. 2874 of the Game Branch, Winnipeg, was included in the bag of a group of Brandon hunters recently while hunting south of Delisle. The bird was banded in 1944. The bird was not discovered until Stewart Pickett was putting the bird after his return home.

Inspecting Flocks
CALGARY, Man.—A staff of three men will soon be on the road inspecting and banding poultry flocks. On behalf of the state, Mr. J. Foster, provincial poultryman, a few inspectors, all of whom are hired on a temporary basis, have already made a start but delayed harvesting has prevented the work from getting under way as early as in other years, Mr. Foster stated. Inspection should be completed before the end of the year.

Has Had Long Service
CALGARY.—George A. Morrison, a man who has written \$2,000,000 words in the past 38 years, has retired from the staff of official court reporter at the Calgary court house. During his long term of service he has written many books.

Collapse Of Egg Market Unlikely
WINNIPEG.—The general level of egg prices in 1952 will be "somewhat lower than in 1951," but there will be no collapse of the market, W. J. Landreth, of Winnipeg, chairman of the Canadian Poultry Council, said. He was commenting on a report by the British Columbia Poultry "chaotic conditions" and imminent collapse of the egg industry.

The immediate likelihood is that egg prices will actually increase somewhat," Mr. Landreth said. "We do not expect a general lowering of prices until the new crop of layers gets into full production some time around November 15."

Scarlet Fever in B.C.
VANCOUVER, B.C.—The worst outbreak of scarlet fever since 1944 has hit Vancouver. Health officials said 752 cases have been reported so far this year, compared to the 1944 total of 975. There were 150 cases last year.

Woman Principal
REGINA.—For the first time in 20 years a woman—Miss Alexandra E. Graham—has been appointed principal of a Regina public school.

How to Use Plenty Of Inferior Feed. . .

The prospects are for an abundant livestock feed supply in Canada, although of inferior quality, following poor weather conditions at harvest time. The same is true in the United States where more feed may be available than a thousand trials and has filled about 80 large note books with his test short-hand notes.

Awarded Scholarship
UNION POINT, Man.—Miss Mabel J. Brown, daughter of Mr. and Mrs. D. Brown, has been awarded \$250, for her work in grade 10 last term. She attended St. Agatha high school for grade 10, and Union Point school for the preceding grades.

Baiting Siles
VANCOUVER.—A bandit who walked into a confectionery store here left pennies and without loss of getting absolutely no answer from the attendant to his demands for money. The clerk recently arrived from China and speaks no English.

Farm Conference To Open December 4 in Ottawa
OTTAWA.—The farm kingdom's biggest annual get-together will open the agricultural department will announce that the annual federal-provincial agricultural conference will be held Dec. 4 to 6.

In past post-war conferences, delegates dealt largely on shrinking markets for Canadian surplus farm products and the need for continued federal financial assistance.

But Korea and the world's rearmament drive has changed the picture drastically. Now it is a case of shortages in some commodities and climbing costs of production and labor that beset the agricultural path.

Sask. Forest Fire Loss Lowest In Twenty Years
REGINA.—Fifty-two forest fires burned in northern Saskatchewan this year, lowest number in at least 20 years, Fred Warburton, resources department fire control chief, reports.

A bureau of publications reports, Mr. Warburton said a total area of 14,000 acres was burned, with timber losses estimated at \$41,000.

Fire fighting costs amounted to \$19,000.

Mr. Warburton said fast action in fire control, often made possible through use of the smoke-jumper's unit, had helped keep the losses at a minimum. The weather also had been favorable with high water levels and an unusually rainy season combining to keep the fire hazard down.

PERSONAL REMINDER
WADENIA, Sask.—A Ole Inland, can tell you the day of the week for any date in 1885 at a glance. He saved his calendar of that year that he brought when he travelled as a young man from Norway.

WOMAN PRINCIPAL
REGINA.—For the first time in 20 years a woman—Miss Alexandra E. Graham—has been appointed principal of a Regina public school.

Advocates Parent-Teacher Talks
—Instead of Report Cards
MOOSE JAW, Sask.—The old-fashioned school report card would be replaced by private, informal and regular parent-teacher conferences if Dr. S. B. Laycock, dean of the college of education, University of Saskatchewan, had his way.

At the convention of the Moose Jaw superintendents Dr. Laycock said individual parent-teacher conferences would have to be improved, a great deal in order to carry out such a program.

Many interviews have failed to do anything for the child and have created antagonism between the home and school because teacher or parent, or both, adopted the wrong attitude, or because the interview was not properly conducted.

Teachers should not hold a conference if their aim is to put pressure on the child or complain about the child. Teachers must feel a sincere desire to help the child, Dr. Laycock said.

Teachers also must have genuine respect for parents. "The teacher must realize that the child's home and parents poverty affect his social and emotional development in school and also his ability to read, to spell or compute."

CAFES HARD HIT
WINNIPEG.—A Vancouver restaurant official said that Canadian restaurants have suffered "a very high mortality rate" during the past three years because of rising costs and operational losses.

GRAPE PRESERVES
Good news is in store for the housewife who makes her own grape preserves for year-round table use. A record grape harvest this autumn assures a plentiful supply of Canadian grapes at attractive prices.

Here are some popular grape recipes:

Grape Jelly
Wash, drain and place Concord grapes in a preserving kettle. Mash and heat until the juice flows freely. Strain through jelly bag and add 8 cups sugar for each cup juice. Boil until sugar sheels from edge of spoon, from 10 to 20 minutes. Pour into sterile glasses, and when cool, cover with metal caps. Makes 4 quarts of jelly.

Grape Relish
Half peck Concord (blue) grapes, 1 cup whole allspice, 1 pound stick cinnamon, 1 cup grape juice, 1 cup cider vinegar, 3 pounds sugar. Let ingredients except sugar come to boil and strain. Boil for 20 minutes after adding sugar. Pour into warm, sterile glasses. This recipe is delicious with meats.

Grape Punch
Ingredients are pint of grape juice, 1/2 tray ice cubes, 1 cup of sugar, juice of two lemons and juice of one orange. Dilute with water, ginger ale or other beverage to suit taste.

Junior Red Cross

A heavy increase in the number of Junior Red Cross branches and members is reported from the Alberta division with 1100 branches and 30,313 members enrolled so far this year. Last year at the same time there were 706 branches and 18,091 members.

According to Mrs K. Herman provincial director of Junior Red Cross

the growth is due to increased support from the Alberta Department of Education and school superintendents who see in Junior Red Cross a program that gives the child concrete experience in doing his share of facing the problems of the modern world.

The international friendship program of Junior Red Cross is being stressed by educators who find that in these days of world stress and tensions the program is a practical means of developing friendship and tolerance.

The children make portfolios showing their daily lives and these are exchanged with students in foreign countries. Dr. J. Uppichard, national director of Junior Red Cross who recently visited Alberta, reported that Alberta had sent 50 percent of the portfolios exchanged during the 1950-51 school year.

At the present time Alberta Juniors are also making layettes and clothing and filling health and school kits for needy children in war-ravaged areas. During the 1950-51 year 40 Alberta Juniors made clothing valued at \$2,000 for overseas distribution and it is expected that this figure will be exceeded this year.

Improvement

The Crop Improvement Association of Manitoba, Saskatchewan and Alberta are making a major contribution to the welfare of agriculture in Western Canada.

What Are They? Provincial Crop Improvement Associations are voluntary organizations. In each province they are sponsored and directed by representatives of the Canadian Seed Growers' Association, Canada and Provincial Departments of Agriculture, Universities, Grain Companies, and others. These agencies work together to assist the grower of Registered and Certified seed to market his product. Their aim is to provide a beneficial service to seed grower and purchaser alike—all farmers.

Main Purpose: The major purpose of these Associations is to facilitate the wider use of Registered and Certified seed of farm crops. This is accomplished by: (1) Establishing fair and reasonable seed prices. (2) Maintaining the highest possible standards in the production of seed. (3) Enlisting the support of country elevator agents as saler-men of Registered and Certified seed. (4) Growing a wider farmer-demand for good seed.

Ordering Seed: Any farmer can place an order for Registered or Certified seed with his local Elevator Agent. The Agent forwards the order to his Head Office, or the Secretary of the Provincial Association, who directs it to a seed grower with stocks for sale. The grower ships the seed directly to the farmer at his country point. The procedure is both simple and satisfactory.

At Your Service. All Line Elevator Agents of the Companies listed above are authorized distributors of Registered and Certified seed. They are at your service again this year. Line Elevator Agents are urged to promote the wider use of Registered and Certified seed among their farmer-customers. After all, no factor is more important in successful grain crop production than is the use of "good seed."

A growing plant requires access to some 20 chemical elements.

Rene B. Perrault Montreal who has been elected president of the Canadian Chamber of Commerce at the annual meeting in Quebec City October 31. He takes over from Dr. Francis G. Winspear of Edmonton, former president of the Canadian Chamber of Commerce.

Radio inspectors of the Department of Transport are now engaged in a check-up on all radio licensees throughout the province. Radio licensees should be kept handy for inspection when called upon. Those unable to produce current licenses must expect a court action with consequent fine and costs. The department trusts however, that anyone who has, or has neglected to procure his or her license will immediately do so and that a minimum of such unpleasant action will be necessary. The color licenses this year is yellow for the \$25.00 issue and white for the \$20.00. A separate license is required for automobile radios. All licenses expired on April 1st last. They may be procured from post offices and some radio dealers.

YOUR PERSONAL PENSION PLAN

Retirement Act
HERE ARE MORE QUESTIONS
AND ANSWERS ON
**ALBERTA
GOVERNMENT
ANNUITIES**

QUESTION: Are annuities paid monthly?

ANSWER: Yes, the depositor at date of his retirement may select that his annuity be paid monthly. Quarterly, semi-annually, or annually. Annuity payments, however, must be at least \$10.00, otherwise the Provincial Treasurer may pay the sum at the credit of the depositor in a lump sum, or in installments.

QUESTION: May a depositor's annuity or his annuity payment be seized or garnished?

ANSWER: No. Neither the depositor's account prior to retirement nor his annuity payments after retirement may be seized, garnished, assigned or transferred.

QUESTION: Does the Government guarantee the Fund?

ANSWER: Yes. The fund and the payment of all annuities interest and other monies from the Fund are guaranteed by the Province of Alberta.
